770G/GP

Power that checks and balances

Increased engine horsepower, torque, and blade pull over earlier models produce generous power and lugging ability, to deliver more power to the ground, easily pull through tough spots, or tackle steep hills. John Deere motor graders are designed with optimal weight distribution over each axle, for outstanding balance and grading performance.

Freedom of choice

Our G-Series Graders let you choose how work gets done. On our GP models, opt for fatigue-minimizing dual-joystick controls, choose state-of-the-art electrohydraulic (EH) fingertip armrest controls, or have the best of both worlds with a field kit that allows you to easily swap between the two. Our G models offer conventional lever-operated controls. And based on customer feedback, all models still have a steering wheel.

Count on cross slope

Standard on all GP models, cross slope maintains slopes by automatically adjusting one side of the blade while the operator controls the other. Cross slope can also be operated in "manual mode" as a slope meter. Automated cross slope simplifies holding a consistent slope by reducing operation to a single lever. Both dual-joystick controls and fingertip armrest controls come equipped with cross slope and can be easily upgraded to 3D SmartGrade.

Unlimited grade control

Industry-first John Deere SmartGrade Motor Graders are fully integrated and calibrated from the factory, arriving at your jobsite ready to work. In-cylinder position sensing allows the machine to stay on grade no matter what blade pitch, articulation angle, or circle offset you're running, without the limitations imposed by masted systems.

Working in tandem

Utility contractors will appreciate the outstanding visibility to the tandems on GP models while working around obstacles such as water mains and hubs. Crab steering positions the tandems on firm ground, reduces side drift, and increases side-slope stability.

Picture yourself here

All-around visibility is virtually unobstructed, with a clear view to the heel and toe as well as behind the moldboard. You can also see the area beneath the front axle, for increased awareness of oncoming obstacles. LCD hi-vis monitor provides intuitive, pushbutton access to vital machine data displayed via simple, easy-to-navigate icons and menus. High-resolution rearview camera with dedicated in-cab monitor comes standard.

Uptime is everything

All daily service points, including fuel and diesel exhaust fluid (DEF), are grouped on the left side of the machine for convenient ground-level access. On the right, periodic-service points including the engine oil, fuel, hydraulic, transmission, and differential filter bank are within easy reach. Cooling package minus stacked coolers plus hinged swingout fan simplifies core cleanout. Variable-speed hydraulically driven fan runs only as fast or as often as needed, to conserve power and fuel while reducing noise.

Premium productivity

Featuring a fully sealed bearing and pinion that run smoother and quieter, the industry-leading design of the optional premium circle reduces operating costs while delivering 40-percent more torque and 15-percent more speed than a traditional circle. The premium circle eliminates having to compensate for wear in the circle and improves accuracy when using a grade-control system — especially with John Deere SmartGrade. And greasing intervals of only four zerks every 500 hours make the premium circle essentially maintenance free. Durable dual-input and proven single-input circles are also available.

Precision Construction

From grade management and obstacle detection to product automation features and jobsite intelligence, this suite of construction technology delivers productivity solutions to help you get more done, more efficiently.

John Deere construction equipment comes with in-base connectivity free from subscriptions or annual renewals. Analyze critical machine data, track utilization, review diagnostic alerts, and more from the John Deere Operations Center™. The Operations Center also enables John Deere Connected Support™, which uses data from thousands of connected machines to proactively address issues before they arise. Your dealer can also remotely monitor machine health, diagnose problems, and even update machine software without a trip to the jobsite.*

*Availability varies by region and product. Options not available in every country.

PUT INTELLIGENCE TO WORK

With **Automation Suite** including industry-exclusive Auto-Gain for Cross Slope, Auto-Pass, and Auto-Shift PLUS, it's push-button easy to set yourself apart from your competition. Our automation advantages for all Grade Pro (GP) models are also available as field kits on SmartGrade models:

- Auto-Shift PLUS also available on all G-Series models — allows operators to work without using the inching pedal.
- Auto-Gain for Cross Slope automatically adjusts gain settings based on ground speed to maximize performance.
- Auto-Articulation lets the operator increase the maneuverability of coordinated steering and articulation while using only the joystick-steering function to steer and operate other necessary functions without manually articulating the machine.
- Machine-Damage Avoidance eliminates the risk of blade damage to machine structures during any operation.
- Auto-Pass makes grading easy by automatically placing the blade on the ground and activating the grade-control system (when equipped) at the start of the pass, then automatically raising and resetting the blade at the end of it.
- Use Blade Flip to automatically mirror the circle to a preset angle.
- Easily prepare the machine for transport with Machine Presets.
 Stow the blade and ripper, turn on the lights including the hazards, and enable Auto-Shift with one push-button press.

Additional equipment (continued)

Key: ● Standard ▲ Optional or special See your John Deere dealer for further information.

770G/GP	Overall Vehicle (continued)
	Environmental drains with hoses for engine, transmission,
	hydraulic, differential fluids, and engine coolant
	Hydraulically driven cool-on-demand reversing fan
	Banked easy-access vertical spin-on filters for hydraulic,
	transmission, and axle fluids
	Engine rotary ejector precleaner
•	Automatic differential lock
•	Engine-stall prevention and auto shutdown
	Adjustable rotary engine precleaner (FT4/Stage V)
•	Heavy-duty air cleaner (FT4/Stage V)
•	Single-input circle drive
	Single-input circle drive with slip clutch
<u> </u>	Heavy-duty dual-input circle drive without slip clutch
	Heavy-duty dual-input circle drive with slip clutch
<u> </u>	Premium circle
A	Auto-Shift transmission
<u> </u>	Auto-Shift PLUS transmission
A	Blade-impact-absorption system
A	Front and/or rear wheel fenders
A	Quick-service bank for transmission, hydraulic, engine oil, and
	engine coolant fluid changes
A	Secondary steering
	Sound-absorption package (Tier 3/Stage IIIA and Tier 2/Stage III) Wheel chocks
	Automation (standard on SmartGrade™ models, optional on
	Grade Pro [GP] models)
A	Automation Suite
	Auto-Articulation
_	Auto-Gain for Cross Slope
	Auto-Pass
	Blade Flip
	Machine Presets
_	Machine-Damage Avoidance
_	machine bamage / Woldaniec

770G/GP	Front Attachments
	Front push block
	V-type front scarifier with float position, 5 shanks
	Mid-mount scarifier with float position, 11 shanks
	Front Balderson-style lift group with float position
A	Front-mounted dozer blades
	Rear Attachments
	Full bottom guard with access panel and side guards for rear
	vehicle protection
	Rear-mounted ripper/scarifier combination with rear hitch and
	pin, 3 ripper shanks
	Rear counterweight with rear hitch and pin
A	Rear hitch and pin
<u> </u>	Extra scarifier shanks (9) with teeth for rear ripper scarifier
A	Extra ripper shanks (2) with teeth for rear ripper/scarifier
	Grade Pro (GP) Option
•	Low-profile GP cab with opening lower front and side windows
A	Low-profile GP cab utilizing laminated glass with fixed lower
	front and side opening windows
•	Premium heated, leather/fabric, high-wide-back, air-suspension seat with armrests
	Dual-joystick controls
A	Fingertip armrest-mounted controls including steering lever
	Steering wheel
	Cross slope
•	Return to straight
	Grade Control
A	SmartGrade available on GP models
	Mast mounts
A	Topcon ready available on G and GP models
	Trimble ready available on G and GP models
