

SELF-PROPELLED SPRAYER UPGRADES

DECEMBER 2019

JOHN DEERE

Cover more ground in comfort, with ease
with the latest sprayer and features

The robust John Deere Sprayer portfolio gets even better with Model Year 2020 improved features. Learn more about the updated all-wheel drive system available on the R4045 and R4060, and 5 years of JDLink™ Connect as standard across the entire range.

More solution is the solution

The John Deere R4060 Sprayer, featuring a 6,057 L solution tank, lets you spray 5 more hectares per hour between fills.¹ Choose the wide 36.6 m (120 ft.) or 40.2 m (132 ft.) carbon fibre boom option to cover even more ground.

New for the R4060 and R4045 for model year 2020 is the CommandDrive™ all wheel-drive system, that lets you travel over hills, wet spots and soft ground, with a quieter ride and better fuel efficiency.² Add in flotation tyres to further reduce compaction, get in the field sooner and spray later.

John Deere's latest Sprayers come standard with 5 years of JDLink Connect, allowing automatic transfer of agronomic data like "As Applied Rates" to The John Deere Operations Center as well as enabling unparalleled Connected Support from your John Deere Dealer.

In addition, optional John Deere technologies are available, including:

- ExactApply™ nozzle control system
- Premium Activation unlocking John Deere Section Control, In-Field Data Sharing and AutoTrac™ RowSense™
- BoomTrac™ Pro

Ask your John Deere dealer how you can cover more hectares with fewer fills and a quieter ride with the R4060 Sprayer.

¹ Compared to previous models with a 4,542 L solution tank

² Compared to models without optional CommandDrive system

Model	R4045	R4060
Engine, kW (hp)	258 (346)	258 (346)
Solution Capacity	4,542 L	6,057 L
Boom Width, m (ft.)	Up to 40.2 (132)	Up to 40.2 (132)
Boom Sections	Up to 13	Up to 13
Application Speed	40 km/h	40 km/h
Transport Speed	56 km/h	56 km/h

BETTER TRACTION, QUIETER RIDE

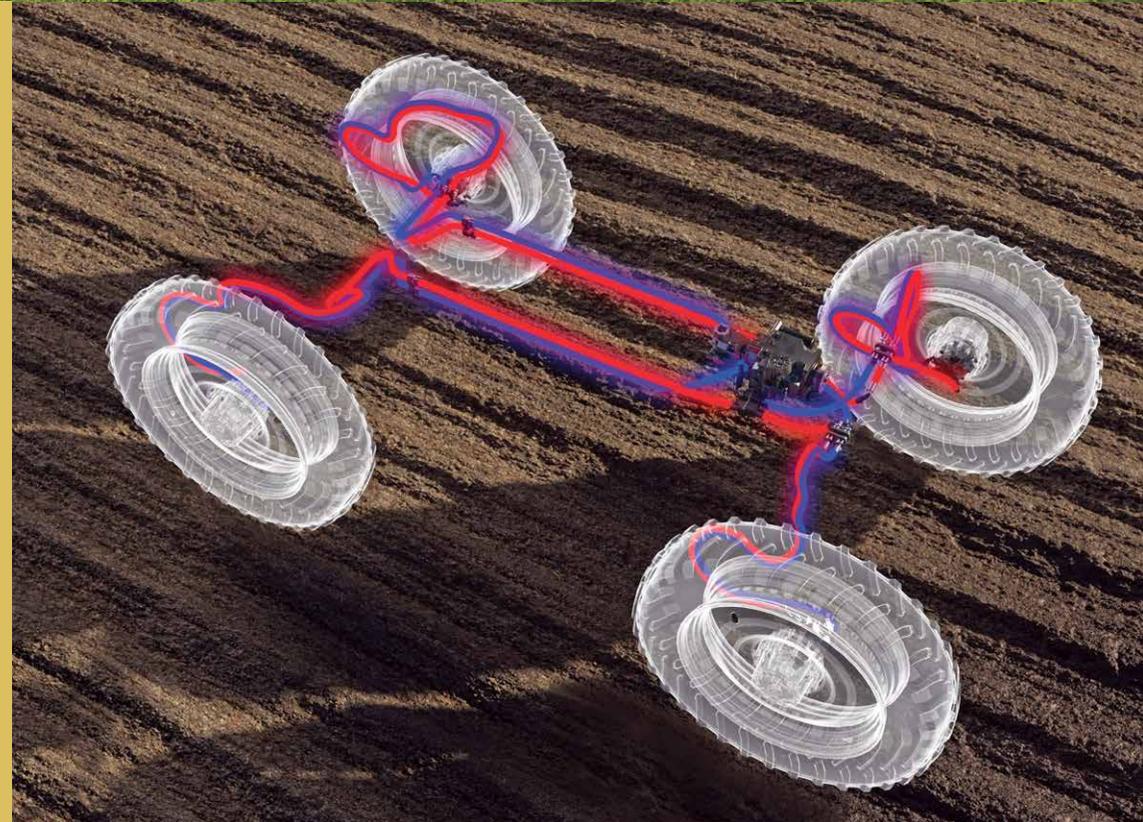

CommandDrive™ all-wheel drive system maintains your selected speed at lower RPMs when possible, and automatically increases RPMs when you need more power. This gives you a quieter ride and fuel savings.² The CommandDrive, available on the R4060 and R4045 Sprayers, also lets you travel over hills, wet spots and soft ground easier.

The CommandDrive system adjusts to slow the wheels that are slipping and direct more flow to the remaining wheels to retain all-wheel-drive.

When stopped, engaging the Autodrive setting allows you to reduce noise in the cab and save fuel by reducing engine speed to 900 RPMs. Reducing RPMs when possible will:

- Provide a quieter operator experience
- Reduce fuel consumption
- Reduce Fuel / Diesel Exhaust Fluid (DEF) consumption (Final Tier IV/Stage V only).

Ask your John Deere dealer if sprayers with CommandDrive are right for you.

JDLink™ Connect provides an Easy, Reliable Connection Between You and Your Machines

Agronomic data from your in-cab displays, like as-applied data, becomes even more powerful when you can access and use it remotely, away from the field. Sending it from the field immediately and automatically can also prevent it from getting lost. That's why Model Year 2020 4 Series Sprayers will come straight from factory with 5 years of JDLink Connect.

JDLink Connect opens an information pipeline between you and your machines, so the technology on your equipment can “talk” to you. In addition, you can tell your machines what to do and have them report back. With JDLink Connect you get a steady, automatic flow of agronomic data between your machines and the devices you use to manage your operation, so you can make sound, timely decisions for your farm—wherever, whenever.

* Activation/subscription required. Some additional accessories and/or components may be required. JDLink requires a mobile data connection to transfer information from machine to JDLink website.
