New Features:

Over The Air Reprogramming – StarFire™ 6000 now supports over the air (OTA) reprogramming. The StarFire™ 6000 must be on software version 3.70M or newer to allow OTA via MTG.

*Region 4 (US & Canada Only) and Region 2 Only – John Deere Mobile RTK Signal icon has been updated

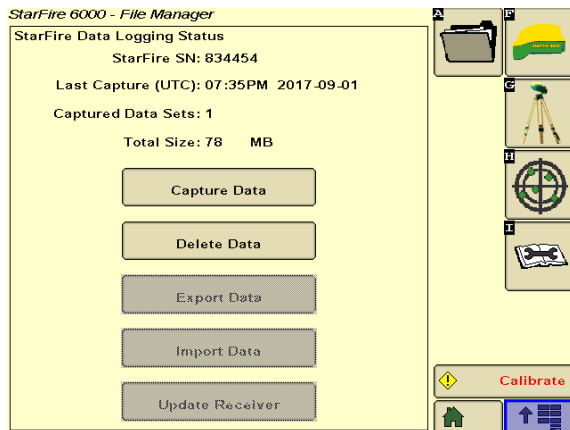

USB Drive Softkey – The icon for the USB Drive has been updated to show the File Manager Icon. It will also now be named "File Manager"

Satellite Information Softkey – The icon for the satellite information softkey has been updated.

Capture Data Button – Layout on the Capture Data screen has been updated. Export Data, Import Data and Update Receiver will become highlighted once the USB has been inserted into the onboard StarFire™ 6000 USB Port.

Release Notice

These are software release notes for GreenStar™ 3 2630 and related products. Release Notes can be found on www.stellarsupport.com. Note: Your use of the software is governed by the End User License Agreement included with the software.
