

StarFire™ 6000 and StarFire™ 6000 Integrated Receiver

Software Update 21-1 Release Notes

4.50P

New Features:

StarFire™ 6000 and StarFire™ 6000 Integrated Receiver Software- The 21-1 software release enables the ability for the StarFire™ 6000 to utilize GLONASS with Mobile RTK access subscriptions where available.

See operator's manual for further information about the StarFire™ 6000 and StarFire™ 6000 Integrated Receiver software functions.

Resolved Items:

Slow Speed Reverse S-ing

Stability improvements while using AutoTrac™ at slow speeds in reverse.

Using TCM Field Calibration as a Factory Calibration: Storing the field calibration of a StarFire™ 6000 Integrated as a factory calibration previously required a power cycle after performing the field calibration. This has been resolved and a restart is no longer required.
